ZAFFARESE

PlanSign

A complete sign system in timeless design and sturdy material with a unique lock system.

- Wall sign, projecting sign, suspended sign, meeting room sign and desk sign.
- Paperflex sign for paper insert of international and letter sizes for quick updating.
- Monolith as an info stand.
- PlanVision, a digital information system built into a monolith, wall sign or suspended sign.

ABS/Glass Signs

Like glass, ABS is a material which allows one to indulge one's creative instincts and produce a product which is both unique and distinctive.

Glass is a rigid material but with an entirely random molecular structure which allows the passage of light and is transparent. This gives glass unique properties compared with other materials, and the use of transparent materials such as glass and ABS for signage presents exciting challenges. In addition, glass is an environment-friendly, permanent, variation-rich and cost-effective material that requires a minimum of upkeep.

CurveSign

A complete signage system featuring timeless design, sturdy materials, gently curved front and a unique locking system - that matches all environments, including the environment of the future.

- Wall signs, projecting sign, suspended signs, meeting room signs and desk signs.
- Paperflex signs for standard paper formats for quick updating.
- Monoliths as info stands.

Indoor Monoliths

Interacting with architecture and the environment.

Monoliths are made of aluminium, steel and glass and are designed to harmonise with the other signage and the building as a whole. Graphics and choice of colour are coordinated with design manuals and the environment.

Lighting can be built into monoliths to illuminate logos in the dark. The monoliths can also be fully or partially illuminated using spots mounted at ground level. Our graphic designers prepare sketches and draft designs in consultation with the customer prior to production.

LockSign

A sign system in classic design and sturdy material with a unique lock system.

- Wall sign, projecting sign, suspended sign, meeting room sign and desk sign.
- Paperflex sign for paper insert of international and letter sizes for quick updating.
- Monolith as an info stand.
- Digital information system built into a monolith, wall sign or suspended sign.

Signs for Homes

Flexible and sturdy signs with unique locking system, particularly suitable for apartment blocks and institutions.

The signs are a part of the classic LockSign signing system, a comprehensive range of sign sizes and types that can be combined with each other to provide uniform signage of the entire indoor and outdoor environment.

Braille and Tactile

Braille is a tactile medium, which is above all used by blind and visually impaired people.

The term tactile refers to the fact that the sense of touch is used in reading.

Using braille it is possible to reproduce letters, numbers, punctuation marks, mathematical characters, words and syllables, symbols and notes to be read using the fingertips.

GuideSign

A complete signage system in timeless design, sturdy materials, unique locking system - matches all environments, including the environment of the future.

GuideSign is a modular sign system with a comprehensive range of sign sizes and types that are mutually compatible and can be combined in a countless variety of ways, thus providing opportunities for uniform and consistent signage of the entire indoor and outdoor environment.

Outdoor Signage

Outdoor signs by DanSign help create a professional impression in the minds of visitors and employees alike.

The signs must be designed to blend with the surrounding environment, and a great deal of thought must be given to detail.

Moreover, the signs also play an important and practical role in guiding people to the right location in relation to the reception area, staff entrances etc.

DanSign offers individually customised solutions with or without built-in lighting in facade signs, monoliths etc. using neon lights or LEDs, for example.

Electronic Signage

The complex task of wayfinding in a building becomes simple with a digital sign solution.

Signs are automatically updated by a click of the mouse, visitors are guided to their destination, and you staff saves time to concentrate on customer service.

Our digital sign system offers a perfect sign solution in any building where you want service and inform guests and employees about meeting room activities, welcoming of guests, anniversaries or even internal information.

It is the ideal solution for providing guests and employees with information about meeting room activities, welcoming guests, red-letter days or perhaps internal information about sales curves or production levels.
